

## Certified Alarm Technician Training Programs

The National Training School (NTS) is the definitive training source for security professionals, providing the knowledge necessary to complete installations accurately and efficiently and prepare technicians for licensing. NTS is sponsored by the Electronic Security Association (ESA), and represented in New York by the New York State Electronic Security Association.

### **Benefits of Attending**

- NTS graduates are more confident in their abilities. They perform better installations, and are more professional in dealing with customers.
- Companies with NTS certified employees gain a distinct marketing edge over competitors. They tell prospects, "Our installers are experts. They are certified by the National Training School." Certificates and patches give consumers confidence.
- NTS helps security professionals stay up-to-date on the latest trends and issues in the security business. Customers note your expertise as your installations improve.
- NTS helps to raise the image and professionalism of the entire industry.
- Companies that send employees to NTS attract the best workers – those interested in being top-notch security professionals!
- Security professionals who attend NTS classes receive course material as a reference to use during and after the course.

**Having trained over 45,000 individuals since it's founding in 1985, clearly shows why ESA NTS is referred to as the "Definitive Training Source in the Electronic Life Safety and Security Industry"...**
